Ultra-Mini Mouse SMK-LINK

System Requirements

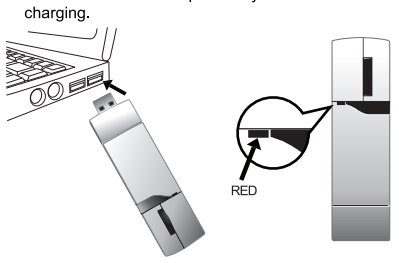
- Hardware: 1 available USB 1.1 or 2.0 port
- Operating System: Windows 2000, XP, Vista or Windows 7; Mac OS 10.4.6+

Package Contents

- Ultra-mini mouse
- USB Receiver Dongle (attached to the mouse)
- User's manual
- Carrying pouch

Charging the Battery

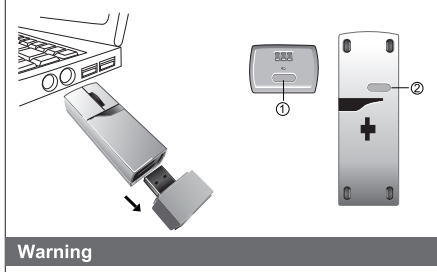
- Fully charge the built-in and sealed Lithium battery before initial use. The charging process may take up to 1 hour.
- Remove the USB receiver dongle from the mouse, plug it in the computer's USB port.
- Magnetic-attach the end of the mouse to the end of the USB receiver dongle while the dongle is plugged into the computer's USB port.
- When battery is running low, the LED indicator light flashes red. During charging the LED indicator remains solid red. When fully charged the LED light turns green.
- Remove the mouse from the receiver dongle when the battery is fully charged.
- Please ensure the computer stays ON and AWAKE during charging.



Connecting to the Computer

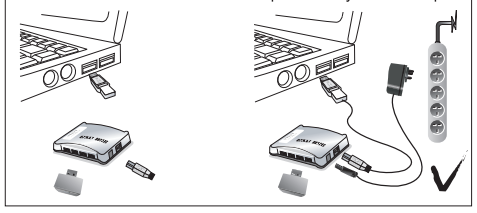
- Separate the receiver dongle from the mouse turns power on; insert the receiver dongle to the end of the mouse (store and carry) turns power off.
- Make sure the receiver dongle is plugged in the computer's USB port.
- To pair up the mouse with its receiver dongle, please follow the 2 simple steps below to reconnect the mouse to the receiver:

  (1) Press and release the reset button located on the side of the mouse receiver (1).
  (2) Press and release the reset button located on the bottom of the mouse (2).



Warning

- To prevent power overload during charging, it is not recommended to plug the receiver dongle to an external USB Hub unless the USB Hub is powered by an AC adapter.



One-year limited warranty.

Regulatory Compliance

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

FCC Certification

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Consult the dealer or an experienced radio/TV technician for help.

Notice: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. Extension cables are not recommended, if used, they must be shielded in order to comply with the emission limits.

IC Certification

The term "IC" before the certification/registration number only signified that the Industry Canada technical specifications were met.

Declaration of Conformity

Hereby, SMK-Link Electronics Corporation declares that this product is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.
